

BRITISH SEMINAR ABOUT INNOVATION IN AGRONOMY: CLIMATE CHANGES, PESTS AND FERTILIZERS

QUESTIONS FOR THE WEBINAR:

1. Climate change. How will the approach to tillage change? (Include drought issues, how to reconsider the approach to growing crops, opinions and experiences of foreign experts)
2. New pests and diseases on conventional crops. Which problems to expect in the coming years (facts of new pests, how to prevent and neutralize).
3. Prohibition of chlorpyrifos: the consequences of the ban, what to replace
4. Strip drilling and its contribution to improving soil health.
